DETAILED ACTION

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 17-28 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-12 of U.S. Patent No. 6,680,071 B1 ('071). Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims of the patent are to a pharmaceutical composition which comprises of an active ingredient-an opioid agonist-fentanyl, in a solid form, that is fast dissolving 1-30 sec in the oral cavity, obtained from subliming solvent, the active ingredient present is from 0.2-95% by weight of the composition, administered to patient experiencing chronic pain. The only difference between the patent and the instant claims is with respect to the time it takes for fast dissolving. In the instant application it takes 1-60 sec. The patent claims 1-30 which is within 1-60 seconds of the instant case. Thus the claims of the patent are within the scope of the application.

Conclusion

Claims 17-28 are directed to an invention not patentable distinct from claims 1-12 of commonly assigned U.S. Patent No. 6,680,071 B1. Specifically, for the reasons stated above under obviousness-type double patenting rejection.
